Subject: Letter of recommendation for Mr. Clément Delteil

Dear Sir/Madam,

We have welcomed Clément Delteil to the Geospatial Data Science & NLP team, for a 6-month internship. We are delighted with the work he has done on the subject of Confidential Learning and its application to a data production project.

Clément showed exemplary dedication and commitment throughout his internship. He has fitted in very well with the team and the company. It was a pleasure to work with him.

He demonstrated a good understanding of the company's issues and challenges. The weekly presentations we asked him to make were always clear, well structured and of good quality. Clément's communication skills and autonomy were also key qualities.

We pushed him to explore and apply new methods of data analysis, and to take a critical look at his results, particularly in relation to the business needs. In this respect, he has developed positively.

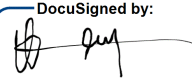

From a technical point of view, we were very pleased with his level of programming in Python and Machine Learning, as well as his progress in SQL and geo-spatial data processing (skills he developed during his internship). He was able to carry out a complete and relevant state of the art on the subject of Confidential Learning, and then propose solutions adapted to the company on the subject.

We are convinced you'll find in him a colleague who meets your expectations for a data scientist position.

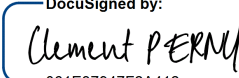

Please do not hesitate to contact us for any further information about Mr. Clément Delteil.

Yours sincerely,

Claire Vinet
